Professional Summary

Aspiring computer engineer passionate about building impactful solutions with modern web technologies. Experienced in full-stack development, real-time applications, and delivering clean UI/UX through collaborative problem-solving.

Skills

- **Languages:** C/C++, JavaScript, TypeScript, HTML, CSS, SQL, REST APIs, Data Structures
- **Frameworks & Tools:** ReactJS, NodeJS, ExpressJS, MongoDB, MySQL, Firebase, Git, Figma, Cloudinary, Bootstrap, Tailwind, Prisma ORM, WebSocket, Render

Projects

Multilingual DocCluster *Python, ReactJS, KMeans, TF-IDF*

- Built a multilingual document clustering tool using **TF-IDF**, **KMeans**, and advanced preprocessing for scalable NLP applications.
- Developed a custom **translation API** integrated with a **ReactJS frontend** for cross-language search and grouping.
- Designed real-time data pipelines to improve clustering accuracy for large-scale multilingual corpora.

Chatify *WebSocket, MongoDB, Cloudinary*

- Built a feature-rich real-time chat application using **WebSocket** for bi-directional communication and a clean, responsive UI.
- Implemented secure user login via **OAuth** authentication.
- Integrated **Cloudinary** and added a dynamic **theme changer** to enhance media handling and user experience.
- Developed accessibility features: a **Gen-Z slang translator** for older users and a **voice-to-text module** for those with typing difficulties.

YelpCamp *MongoDB, EmbeddedJS, Cloudinary, Maptiler*

- Built a campground platform with full **CRUD**, secure **authentication**, and robust validation.
- Integrated **Maptiler API** for interactive maps and location-based search.
- Enabled reviews, ratings, and seamless image uploads using **Cloudinary** and **MongoDB**.

Experience

Full-Stack Developer (Freelance) *July 2023 – Present*

- Developed a production-level full-stack **E-commerce clothing website** using the **MERN stack** with a secure and fully integrated **payment gateway using STRIPE**.
- Currently working as a **Frontend Developer** on a side freelancing project, **MYRASA** – a global perfume e-commerce platform, focusing on scalable deployment, responsive design, and optimized user experience.

Education

VidyaVardhini's College of Engineering and Technology, Vasai

2022–Present

Bachelor of Technology in Computer Engineering — CGPA: 8.24/10

Tarapur Vidya Mandir, Boisar

2020–2022

Higher Secondary Certificate — 87%

Achievements

- Finalist in the **PIWOT Hackathon**, among top 20 teams from 15,000+ registrations across India
- Participated in 4-5 **hackathons**, enhancing collaboration, creativity, and technical skills under pressure
- Zonal level poster presenter in the **Aavishkar Competition**
